WIRELESS PROJECTOR

Portable, ecological, practical, affordable, simple and innovative. Perfect for Netflix and Chill while camping or anywhere else, there is no need to force the eyes into a tiny screen. With a small projector in a box that reflects and amplifies the image of a phone in any pale surface just using magnifying mirrors and the box's walls to help focus the light. Designed with needed precision regarding the focus points of the mirror and the screen's size, Easy to customize and the future of analog technology.
